

## **NGSS Professional Development Workshop Series**

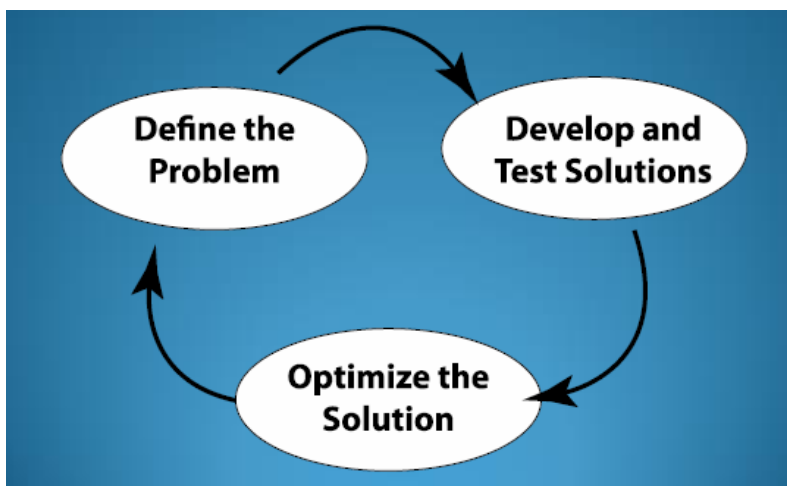

### **Engineering Design and Technology**

**Wednesday November 16, 2016, 9:00 AM – 3:30 PM**

**Fee: \$125 Credits: 5.5 PDU Hours**

In 2016-2017, the Science Education Institute at Raritan Valley Community College will be offering a series of seven one-day workshops designed to help teachers prepare for the implementation of the Next Generation Science Standards (NGSS). This workshop is the third in that series.

In this workshop, participants will receive an introduction to the Framework for K–12 Science Education – a critical document for understanding and implementing the Next Generation Science Standards (NGSS). The NGSS presents a conceptual shift in K-12 science education in which students, over multiple years of school, actively engage in Science and Engineering Practices and apply Crosscutting

Concepts to deepen their understanding of the Core Ideas in Science and Engineering.

This workshop will focus on the *Engineering Design Process* and resulting *Technologies*. Participants will be engaged in exemplary investigations to deepen their understanding of the *Engineering Design Process*. They will take away strategies and to help students define engineering problems, test solutions, and optimize them. During the workshops participants will use several of the Engineering Practices and Crosscutting Concepts. There will be opportunities for participants to reflect on the investigations and to plan lessons aligned to the NGSS.

The workshop will be held at Raritan Valley Community College in North Branch (NJ) and will begin promptly at 9 am and end by 3:30 pm. Light breakfast and lunch will be provided.

The workshop leader, Dr. Wil van der Veen, is a nationally recognized expert in science education and is a member of the New Jersey State Leadership Team for the NGSS. The workshop will be co-facilitated by several K-12 educators from the NGSS Teacher Leader Program – a collaboration between Princeton University, Rider University, and Raritan Valley Community College.
