

The Raritan Valley Community College Student Hotspot Loaner Program is designed to assist students who do not have access to computer technology with a temporary Hotspot. Hotspots will be distributed to those students who meet the eligibility requirements on a first come first serve basis.

The Hotspot loaner is good for one semester and must be returned at the conclusion of the semester. A new application needs to be filled out each semester and students need to meet the eligibility requirements each time. Hotspots can be picked up at the Technology Services Help Desk in Somerset Hall. Students must schedule an appointment for pickup by calling the Help Desk at 908-231-8811.

Students who do not return their Hotspot to the Technology Services Help Desk at the end of the semester will be charged a replacement fee and a hold will be put on their student account.

NOTE: Help for your hotspot is available from Verizon Wireless. Information can be found here: <https://www.verizon.com/support/> Hotspot help is not available from the Technology Help Desk.

Eligibility Requirements

- Student must be enrolled in a minimum of 9 credits
- Student must be in good academic standing
- Student must not have a financial hold on their account
